Retraction Notice

This article has been retracted by the following reasons:

We regret to inform our readers and the scientific community that we are retracting the article titled "A comparative study of clinical symptoms, demographic characteristics and laboratory parameters among primary and secondary dengue cases in a tertiary care hospital in Kolkata" with the DOI: [<https://doi.org/10.18231/j.ijmmttd.2024.006>], published in IP International Journal of Medical Microbiology and Tropical Diseases.

The retraction is due to significant errors in the data, which were not identified during the submission and review process. These errors undermine the validity of the findings and necessitate further evaluation and revision. As a result, the integrity and accuracy of the article have been compromised, and we believe it is in the best interest of scientific transparency to withdraw the article.

We sincerely apologize for any inconvenience caused and appreciate the understanding and cooperation of the journal and its readership in this matter.
